HANDLING

Before continuing any further with the installation of this product please read the following:

- When lifting always keep your back straight. Bend your legs and not your back.
- Avoid twisting at the waist. It is better to reposition your feet.
- Avoid upper body / top heavy bending. Always bend from the knees rather than the waist. Do not lean forward or sideways whilst handling the product.
- Always grip with the palm of the hand. Do not use the tips of fingers for support.
- Always keep the product as close to the body as possible. This will prevent unnecessary and undue strain on the body.
- Use gloves to provide additional grip.
- Always use assistance if required.

ASSEMBLY

Before assembly please see the illustrations below for the Cam Dowel assembly.

Using a screwdriver and cam dowels, assemble the legs, top and fascia as shown

NOTE: The radiator cover shown above is an example. All similar products are assembled using the same method.

INSTALLATION

Please ensure the floor and wall is flat before installation.

1. Attach a mirror clip to the back of each leg as shown using 4 x 16mm screws. Pre-drill the holes to stop the MDF splitting.
2. Place the radiator cover to the wall, and mark the positions of the remaining holes on both mirror clips.

3. Using an electric drill (6mm drill bit), drill holes into the walls approximately 35mm deep.
4. Insert the wall plugs, and then secure the suite with 2 x 32mm screws (supplied).

Note if fitting the cover to plaster board with a cavity behind then propriety wall fixings (not supplied) will be required.

If in doubt, please seek advice from a suitable qualified tradesman.
